

Cooking Made Easy

TECHNOLOGY, INNOVATION, DESIGN AND PERFORMANCE ARE KEY FACTORS IN FOTILE'S PRODUCT MANUFACTURING, MAKING THEM A NAME SYNONYMOUS WITH COOKING EXCELLENCE

At Fotile, it all begins with the brand's thorough understanding of the needs and wants of many Asian kitchens. Making life healthier, safer and more beautiful – that is the aim of Fotile since its inception in 1996. For two decades, the company has never ceased to exude a passion about kitchenware and has therefore raised the standards of the industry through its many innovations.

Being the number-one high-end kitchen appliance brand in China, as well as one with a strong following in Malaysia, Fotile has no doubt carved a niche of its own. Each of its appliances is designed purposefully with the users in mind, be it the various types of hoods and hobs, ovens and sterilisers. Not only are the products

well received by the consumers, the brand's fine quality and design has also won it international accolades, namely the RedDots Awards and IF Design Awards.

To better interact with its customers, Fotile has even launched its first largest kitchen appliances gallery named the Fotile Style in Shanghai, back in year 2012, showcasing the brand's most prestigious kitchen appliances. A 'futuristic corner' also allows visitors a glimpse into some of Fotile's most innovative technology. From time to time, cooking classes are hosted at the kitchen hub, to educate customers on ways to maximise their use of Fotile products.

One of said products is the Fotile W Series. A most recent creation

that has just reached the Malaysian shore, the brand new cooker hoods are the synthesis of several different technologies that will surely appeal to modern homemakers. In its core, the Surround Suction technology boasts an unparalleled extraction capability. The feature increases the smoke accumulation area of the Fotile W series to 0.21m² so that no grease and smoke can escape from any of the four sides of the hood. Combined with the wing-like surround suction plate, intelligent air management and auto turbo system, the Fotile W Series promises you a kitchen free from grease and smoke that might be harmful or create a stain on your kitchen wall and cabinets.

Functionality aside, its canopy design with 4.3" high definition screen display and illuminated touch control ensures complete user friendliness, and despite the type and the amount of dishes you cook, it keeps your cooking zone clean and odour free.

If simple, stylish and functional is what you are looking for, Fotile the kitchen expert will surely not disappoint. Visit its flagship showroom at Solaris Dutamas for an exceptional kitchen experience. 📍
