Taking over the kitchen, Diana Rafar takes us through just exactly why Fotile's new Fotile W hood is her new favourite appliance in the kitchen.

Actress, singer and full-time super mum – Diana Rafar, 33, recently prepared a delicious meal for us in her super chic kitchen at her home. Even though she lives a busy life in the spotlight, one thing she holds close to her heart is her family, making sure that she spends time with her two kids Kashfi Haiqal and Haiqal Izzat, and her husband, Zamarul Hisham, actor, whenever she can. And what better way to spend quality time with the family over a tasty home-cooked feast.

Chatting to Diana whilst she was preparing and cooking several dishes for us, we found out just how much the new Fotile W hood has enhanced her home life.

“Just look at this Fotile hood. And look at what I am making! In the past, this house would be filled with grease and smoke by now, but with technology like Fotile W, all the smoke is instantly extracted so I can see exactly what I'm making.”

Diana whipped up a delicious home-made chicken curry. We're drooling!

And it is true – no smoke is hazing the kitchen and no traces of oil greasing up the surfaces – the Fotile W is truly a must-have innovation in all Malaysian homes. How exactly does it make your kitchen grease and smoke free? – Because of the broader hood style and its wider extraction zone, absorbing and trapping smoke and oil.

With its powerful extraction and effective filtration of smoke and grease however, another fantastic feature that Diana especially loves is just how quiet it is.

“You hear that? It's so quiet. Previously, if I shouted for my kids they would not be able to hear me over the noisy extraction, but now, the Fotile W with its High Efficient Extraction Technology and low noise levels as low as 49decibels means that everyone has to answer me.” She says laughing. “That's one feature I love about this hood.”

As she continues to cook, Diana explains

more of the features of Fotile W that make her life that bit easier in the kitchen.

“There's no smelly odour in the kitchen whatsoever after cooking, as the Fotile W has an odour reduction exceeding 95%. This is especially great for homes that have an open layout meaning unpleasant odours will no longer flow from the kitchen to the living spaces. What's even better is that it's super easy to clean. All you do is open the wing like-surround suction plate of the hood and wipe the traces of oil. It saves me time so I can have more time to eat and spend time with my family.”

Elegant and stylish, the Fotile W has clearly made the busy mum's life easier. Packed with advanced technology, the stainless steel hood blends effortlessly in any kitchen. As Diana says the Fotile W is, “...sleek and sexy!” **CHX**
